

## Products and Services

### Session Packages

1 CRT Session .....\$250  
2nd Followup Session.....\$150

**By Appointment Only**  
**972-245-9471**

**Gift Certificates Available**

### **Live Healthier Today!**

It's Time To Take Responsibility for Your  
Own Health!

### **Complete Wellness & Laser Center**

**2150 N. Josey Ln. Ste. 200**  
**Carrollton, TX 75006**  
**Office: (972)245-9471**

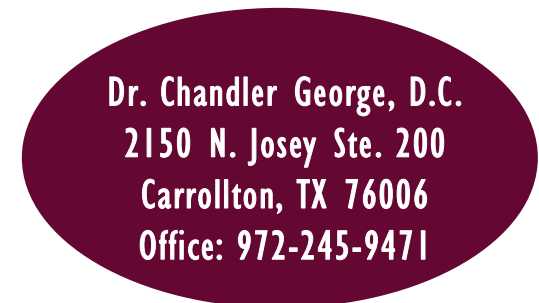

**Email: [info@drgeorgedc.com](mailto:info@drgeorgedc.com)**  
**Website: [www.drgeorgedc.com](http://www.drgeorgedc.com)**

**Located Corner of Josey & Jackson**

*Complete Wellness  
&  
Laser Center*

## **Computerized Regulatory Thermography 2000**

**Dr. Chandler George, D.C.**  
**2150 N. Josey Ste. 200**  
**Carrollton, TX 76006**  
**Office: 972-245-9471**

# What Is The CRT 2000?

The CRT (Computerized Regulation Thermography) is a biological scanning system researched for decades and tens of thousands of cases in both Europe and the United States.

A Computer Regulatory Thermography test measures the amount of body heat in specific organs, such as the breasts or the intestines. When skin temperature changes it can reflect what is occurring within the body's organs and systems. This allows the body to let you and your health care practitioner know where your imbalances or weaknesses may exist in your system.

While x-rays give a structural view, thermography gives us a functional perspective based on the physiology and stress response of organs.

The CRT is highly accurate. It measures 125 specific points located on the face and torso. By measuring your ability to adapt and change in response to stimuli, it can measure your state of health and balance.

European health professionals and major hospitals have used thermography for more than 20 years. In 1997 the United States Food and Drug Administration (FDA) cleared thermography for use, and progressive health professionals nation-wide are utilizing this process. Until now, thermograms were only done in select doctors offices.

## Why should I use this method?

Most tests performed by standard medicine give an incomplete static snapshot of your body. The monitoring of the dynamic regulation of your body can help detect dysfunction before symptoms appear.

# How Does CRT 2000 Work?

Thermography, quite simply, measures heat in targeted areas of the body through the use of the CRT (Computerized Regulation Thermography) diagnostic testing device.

The device visually displays your unique biochemical profile in the form of graphs and diagrams. This allows your body's organs and tissues the ability to communicate any dysfunction or its capacity to function under stressful conditions.

By placing a highly sensitive probe gently on several points on your body, the device receives its first series of measurements. Next, your body is exposed to cool air for approximately ten minutes. After the skin has cooled, a second set of measurements identical to the first is taken. Once this is completed, your scan is finished!

## The procedure is approximately 30 minutes.

A gentle lightweight sensor will measure your skin's temperature on 125 different points.

Your temperature variances are then decoded through the CRT. This will provide important information that is helpful in identifying pathological patterns.

## By Appointment Only

**972-245-9471**

**Gift Certificates Available**

## Prior to the Appointment

- Refrain from the use of homeopathic supplements, such as Kava Kava.
- Refrain from regulative therapy, such as acupuncture.
- Refrain from ingesting alcoholic beverages.

## Day of the Appointment

- No coffee, caffeine, or smoking
- Avoid hot or cold bathing
- Avoid cosmetics or lotions
- Avoid tight clothing
- Wear 2-part clothing
- Avoid exercising and saunas

## Frequently Asked Questions?

**Q: How long does the test take?**

**A:** The whole test takes approximately 30 minutes to complete.

**Q: Will my insurance cover this?**

**A:** Because this is an FDA cleared procedure, it is reimbursable by most insurances depending on your individual policy.

**Q: How much does it cost?**

**A:** The total price for the test and report is \$225.00. We accept Checks, Cash, Mastercard, or Visa.

**Q: Does The Test Hurt?**

**A:** No, there is no radiation or pain with this test.
